

Foot Health Fact Sheet

COMMON SPORTING INJURIES

Did you know?

There are two kinds of sports injuries? Acute injuries happen suddenly and chronic injuries happen after you play a sport or exercise over a long period of time.

Do you experience pain after exercising? Here are some of the most common sporting injuries, which can affect your legs and feet – to explain why they occur, and how your podiatrist can help.

Do you experience heel pain in the morning?

Did you know that plantar fasciitis is the most common form of heel pain? While there are many reasons for morning foot pain, plantar fasciitis is common in runners and dancers. It's best to ask your podiatrist for an assessment, diagnosis and treatment if you are experiencing any kind of heel pain.

Do you have a painful big toe?

This could be Sesamoiditis, which can be caused by anything from 'weekend warrior' workouts, to high intensity activities. It can help to rest or take a break from the activity and check your shoes are the correct type for the activity you are doing. If pain persists, see your podiatrist who can help.

Do you have a bruised toenail?

This is caused by a haematoma. A haematoma is a bleed under the nail, which can be caused by ill-fitting shoes when running or hiking. The first thing you may want to do is check the fit of your shoes is correct – and see your podiatrist if symptoms don't improve.

Do you have painful knees or hips?

Sore knees and hips are caused by many reasons, but often surprisingly, this pain can be caused by your gait, which is the way you walk. A podiatrist doesn't just focus on the feet, they can look at the biomechanics of your foot and lower limb region to assess the potential cause of any hip or knee pain.

Do you have a painful ball of the foot?

This can make walking – or any exercise – very challenging! You might have a stress fracture or a neuroma. When it comes to likely causes for a painful ball of the foot, the list of possibilities is endless. Make sure you book in with your podiatrist to have this properly assessed and treated.

Do you have sore shins?

This could be shin splints, which can be caused by a range of factors – and treated by your podiatrist.

- Have you noticed your toes are clawed?
- Do you have hard skin on your feet? Is it getting worse?
- Do you find it hard to cut your own nails?
- Do you find it hard to fit your feet into shoes because of your bunion?

Ticked one or more boxes? Then you need to see a podiatrist.

GO SEE A PODIATRIST BECAUSE...

Podiatrists are Foot Health Experts and understand the structure and movement of your feet and lower limbs.

They can assess, diagnose and treat foot, ankle, knee, leg or hip pain.

Given your feet alone house a quarter of the bones in your entire body, a podiatrist is best placed to get you moving, active or pain-free.

FIND A PODIATRIST NEAR YOU

Contact the Australian Podiatry Association at podiatry.org.au and search by postcode or suburb to find a podiatrist close to you.
